

2007 Crop Report

Humboldt County Department of Agriculture

DEPARTMENT OF AGRICULTURE COUNTY OF HUMBOLDT

5630 SOUTH BROADWAY EUREKA, CALIFORNIA 95503 PHONE (707) 441-5260

A. G. Kawamura, Secretary

California Department of Food and Agriculture and

Honorable Board of Supervisors, Humboldt County

Jimmy Smith, Chairman Clif Clendenen Bonnie Neely Jill Duffy Mark Lovelace

I am pleased to present Humboldt County's 2007 Crop and Livestock Report in accordance with Sections 2272 and 2279 of the California Food and Agricultural Code.

Humboldt County recorded a value of \$283,551,388 for its total gross agricultural production in 2007. This represents a decrease of \$11.2 million from 2006 production primarily related to reductions in the volume of timber products. Although timber products showed a 12% reduction from 2006, Humboldt County remains California's leading timber producing County. Timber losses were partially offset by an increase in the value of milk products as the result of the conversion of local dairies to organic milk products production. The amount of Humboldt County land registered/certified for the production of organic agricultural products increased by 53% from 2006 to 32,500 acres as producers converted pasture and rangelands to organic grazing and hay production.

The 2007 agricultural production ranking for Humboldt County is as follows.

Timber Production	\$151,530,736
Nursery Stock (cut flowers, ornamental & forest tree production)	47,282,569
Milk & Milk Products	47,036,000
Livestock (beef cattle & calves, sheep, lambs & misc.)	24,823,829
Field Crops (alfalfa, silage, range, etc)	10,028,254
Fruit & Nut Crops	1,604,000
Vegetable Crop	

Please note: The accounts in this report represent estimated gross values. The following summary represents gross agricultural receipts, but does not reflect production costs or net income to the producers.

This summary is made possible through the efforts, expertise and cooperation of numerous individuals and agencies, all of which deserve the credit and thanks for this report.

Respectfully submitted,

Jeff M. Dolf

Agricultural Commissioner

Humboldt County Sustainable Agricultural Report

The implementation of agricultural practices and programs which promote the economic viability of agriculture while minimizing the impacts of these practices and programs on natural resources and the environment is sustainable agriculture. The scope of Humboldt County's biological control programs and organic farming practices are summarized below.

Organic and Certified Producers

ITEM	YEAR	NO. REGISTRANTS	EST. ACRES
Organic Registrants ¹	2007	117	$32,500^{1}$

¹CROPS: Beans, broccoli, cabbage, carrots, cherries, corn, cucumbers, garlic, herbs, flowers, lettuce, melons, onions, peaches, peas, potatoes, pumpkins, sprouts, squash, tomatoes, etc.

Pest Exclusion

PEST EXCLUSION involves the systematic inspection of incoming shipments of plant materials and other high risk and articles which enter Humboldt County at post offices and other terminals (truck lines, United Parcel, air freight, commercial vessels, etc.). The primary objective is to prevent the introduction into Humboldt County plant diseases, insects, nematodes, weeds or vertebrate pests which are or could prove to be detrimental to the local and state agricultural industry and natural environment.

* Shipments r	ejected and/or destroyed.	ST.		

Pest Detection

PEST DETECTION activities are focused on the search for pests which are not known to exist in the State or are of limited distribution throughout California. Detection trapping activities are conducted locally for insect pests such as Gypsy Moth and Japanese beetle. In addition, field surveys are continually being conducted throughout Humboldt County in order to locate and identify noxious weeds, plant diseases and vertebrate pests.
