LAKE COUNTY AGRICULTURAL COMMISSIONER'S ANNUAL CROP REPORT YEAR 2004

COUNTY OF LAKE

Department of Agriculture Department of Weights & Measures 883 Lakeport Blvd. Lakeport CA 95453 Phone: (707) 263-0217 STEVEN HAJIK
Agricultural Commissioner
Sealer of Weights & Measures

September 6, 2005

A.G. Kawamura, Secretary
California Department of Food and Agriculture *And*The Honorable Board of Supervisors of Lake County

FAX: (707) 263-1052

Gentlemen:

It is my pleasure to present the Lake County Agricultural Report for the year 2004 in accordance with §2272 and §2279 of the California Agriculture Code. The gross value of Lake County agricultural production for year 2004 was \$61,516,000. This is up 6% from 2003. This increase is primarily due to increases in the fruit and nut crops and nursery values. **This report represents gross agricultural receipts and does not reflect production costs or net income to the producers.**

The gross value of wine grapes increased 1% in 2004. While the total tonnage harvested increased, the tons per acre and the price per ton, on the average, decreased. Grape acreage increased 5%.

In 2004, the gross value of pears increased 9%. Total production increased 5%. Yields and prices per ton were up from the previous year as well. Pear acreage was reduced 207 acres in 2004.

The gross value of walnuts increased 63% from 2003. Although the acreage decreased slightly, the yields and average price per ton increased.

Livestock production and livestock and poultry values increased slightly while the vegetable sector decreased slightly. Forest products and field crops had significant decreases. The decline in field crops was due to the serious drought. Nursery value increased significantly due to sales in the agricultural sector.

The gross value of pears in this report represents the value of the pears after they are packed and processed. The figures do not indicate the value of the pears at the time of harvest or the gross income of the producers. The gross values of all other commodities in this report represent the value of each commodity at the time of harvest.

I would like to thank our staff Biologists/Inspectors, Dana Thibeau, Kris Eutenier and Denise Patrick for their efforts in compiling the information, providing the photographs, and working on the lay-out of the 2004 Crop Report. I wish to express my appreciation to the many individuals and organizations who contributed to making this report possible.

Respectfully submitted,

Steve Hajik Agricultural Commissioner

¹CWT = 100 lbs.

Includes goats, sheep, hogs, and rabbits.

BIOLOGICAL CONTROL

Biological Control is the deliberate use of natural enemies to suppress or manage pest populations at acceptable levels.

PEST	AGENT/MECHANISM	SCOPE OF PROGRAM
Bull Thistle	Gall Fly	2 Sites, minimal establishment
Italian Thistle	Seed Head Weevil	Generally distributed
Klamath Weed	Klamath Weed Beetle	Widely distributed
	Seed Head Weevil	Widely distributed
	Gall Fly	2 Sites
Yellow Starthistle	Flower Weevil	1 Site
	Hairy Weevil	Becoming generally distributed
	Peacock Fly	Generally distributed
Red Gum Lerp Psyllid	Wasp (Psyllaephagus bliteus)	1 Site
Puncture Vine	Stem Boring Weevil	Generally distributed

PEST ERADICATION

The following pests were under active control and eradication during the year: Dalmatian Toadflax, Scotch Thistle, Plumeless Thistle, Artichoke Thistle, Purple Starthistle, Oblong Spurge, Canada Thistle, Hydrilla*. *Hydrilla is a CDFA program supported by the Lake County Agriculture Department.

PEST EXCLUSION

Pest exclusion inspections are conducted daily at Post Offices and the U.P.S. terminal
