San Luis Obispo County Department of Agriculture

The Commissioner/Sealer A Note from...

San Luis Obispo's ever changing rural working landscape, created by farmers and ranchers, produced an estimated value of \$489,783,500 @ the Farm Gate. This figure can be multiplied by 2.5-3.0 to estimate the total economic vitality that the Central Coast experiences each year

due to the hard work of our agricultural community. Our report's focus, "Meeting Consumer Needs through Weights and Measures", celebrates

a critical function of organized societies. Weights and Measures has its foundation in our nation's early farm economy. The function has remained in the Department of Agriculture even though Weights and Measures officials are responsible for fairness in any transaction involving weight, measure, count or time in an ever changing economy including farm, factory and now, the Internet. Our report is dedicated to Steve Morrison, Chief Deputy Sealer of Weights and Measures

and County Employee for 28 years, who retired in 2001. Steve kept our department near the cutting edge and was a significant influence in weights and measures, administration, policy and national model law development which benefited consumers and businesses throughout California

and the Nation. Thank you Steve, for a job well done. Please check out our new Web Site, www.sloag.org. Crop statistics and critical program information will be posted and updated to improve access to county staff and programs. We believe the Internet provides an excellent opportunity to build upon the county's mission and

guiding principles, which are included on page 15. To all the staff and agricultural community members that make this report possible,

Thank You.

Ri Gud

The Weights & Measures Team... Meeting

Curtis J. Clark, Inspector III

Manuel Mendoza, Measurement Standards Technician II

"I test all gasoline and diesel fuel dispensers at every service station once a year to make sure you are getting a full gallon when you fill up at the pump."

"I am in charge of testing electric meters and gas meters owned by mobilehome parks."

"Gasoline samples are tested for octane. I make sure that oil is labeled properly so you know what you are buying."

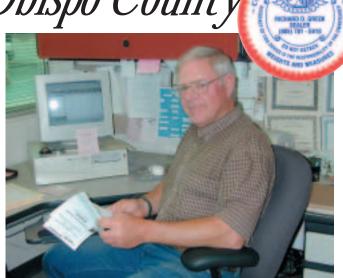

"It is our job to regulate the consumer billing and guarantee the accuracy of all meters."

Your Needs in San Luis Obispo County

Robert Lopez, Inspector III

Jan Hendrix, Inspector III

"I test large propane

trucks and the small

units where you fill up

the 5-gallon tanks you

use for your barbecues

and motorhomes."

"I open and weigh a wide variety of packaged goods to confirm that the actual weight matches the weight stated on the label."

"Bar codes are scanned on a variety of grocery, department and drug store products to ensure that advertised or posted prices accurately reflect what you are being charged." "Precisely calibrated cattle scales play an important part in determining the cost of beef at the supermarket, as well as protecting the rancher's profit."

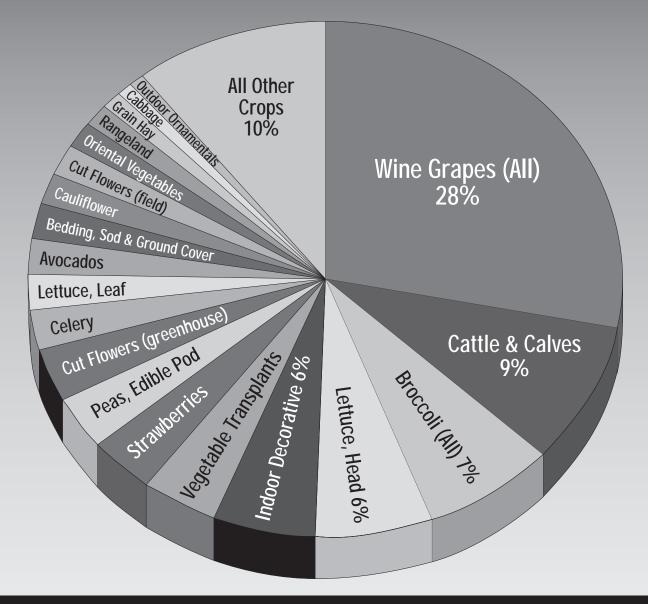

"Moving companies, sand and gravel trucks, and haulers of

bulk agricultural products all depend on consistently

accurate vehicle scales for commerce."

Departmental Goals for 2002

The following goals are in addition to existing programs conducted by the department:

- Further development of our Internet presence to communicate information to the citizens of the County.
- Revise the San Luis Obispo County Grading Ordinance to further protect agricultural resources.
- Facilitate greater communication between farmers and their neighbors regarding pesticide use and public health and safety.
- Develop Geographic Information Maps to assist in managing projects and visually depicting program accomplishments.
- Negotiate with the Coastal Commission to revise the local Coastal Plan affecting agriculture.
- Develop an emergency Food and Agriculture Security Plan to address potential threats to County Agriculture.
- Evaluate all departmental programs for greater efficiency and effectiveness.
- Provide improved office space conditions in Paso Robles and Arroyo Grande.
- Complete planning for an undercover and variable frequency gas station inspection program.

Steve Morrison

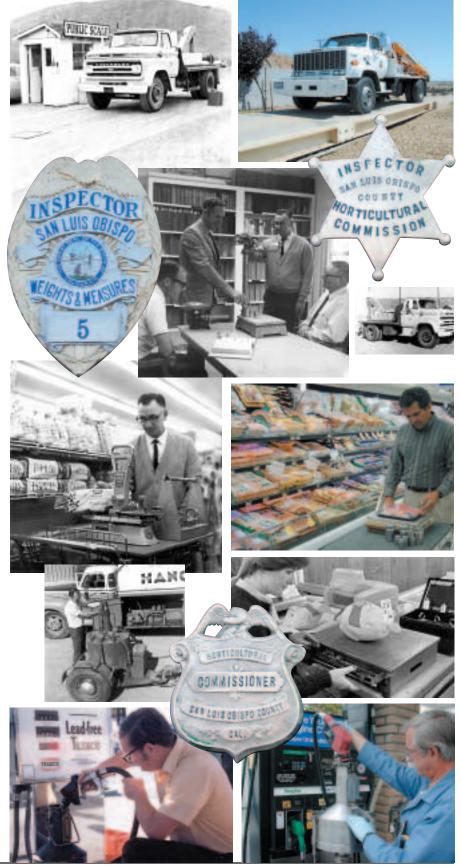

This Annual Report is dedicated to Steve Morrison for his 28 years of service to Weights and Measures Programs and Public Administration at the County, State and National Level.

Steve brought to government an academic background in marketing and private sector experience in the restaurant business. As the Chief Deputy Sealer of the San Luis Obispo County Department of Agriculture/Measurement Standards, Steve's keen intellect, high level of dedication, and leadership produced successful results for any challenge he tackled.

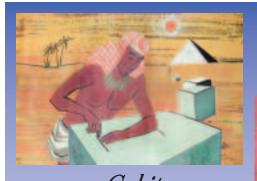

His achievements were based upon his ability to develop relationships and ensure a sound communications process and human network. Furthermore, Steve constantly brought to work an enviable sense of humor and fun enjoyed by coworkers and customers alike.

Meeting the County's Needs

A tradition of dedication throughout the years...

San Luis Obispo County Department of Agriculture

First known measurement. About 20 inches. Length of forearm from point of elbow to end of the middle finger.

King Henry I decreed – The distance from the point of his nose to the end of his thumb was the lawful yard.

How Do We Measure Things? It's all a part of our history...

Fathom

In Britain the Anglo-Saxon measure was the fathom, the length across two arms outstreached equal to 4 cubits or 6 feet.

Three barley corns taken from center of ear placed end to end equals on inch. (Edward II, 1324)

The Roman "foot" was $\frac{2}{3}$ of the Olympic Cubit at 12.16 inches. It was divided into 12 thumbnail breadths called "unciae" by the Romans and "inches" by the British.

Renated by the Sunate and House of Representatives of the France States of America in many field. That the

Secretary of the Treasury be, and he hereby is directed to cause a complete set of all the weights and measures adopted as standards, and now either made or in the progress of manufacture for the use of the several custom-houses, and for other purposes, to be delivered to the Governor of each State in the Union, or such person as he may appoint, for the use of the States respectively, to the end that an uniform standard of weights and measures may be established throughout the United States. SCHUTS AND MEAN TAK may be ranked among the necessaries of life to every individual of human society, SThey enter into the economical arrangements and daily oxeents of every family. They are necessary to every occupation of human industry; to the distribution and security of every species of property; to every transaction of trade and commerce; to the labors of the hashandman; to the ingenuity of the artificet; to the studies of the philosopher; to the researches of the antiquarian; to the navigation of the mariner, and the marches of the soklier; to all the exchanges of peace, and all the operations of war, so The knowledge of them, as in estalslished use, is among the first elements of education, and is often learned by those who learn nothing else, not even to read and write. st This knowledge is riveted in the memory by the habitual application of it to the employments of men throughout life.

iters growing attacks

Animal Industry

The Animal Industry category jumped nearly 30% due to a greater number of cattle sold and a slight increase in value. The remainder of the animal industry further declined in production and value.

Fruit and Nut Crops

Value increased in 2001 by about 9% with a significant recovery from the previous year for avocados and gains in strawberries. Although well over 2,500 acres of wine grapes came into production, the value was up slightly due primarily to a smaller crop from the bearing acreage. Some growers experienced spring frost damage. Oranges and apples continued to suffer from low values.

Vegetable Crops

After a record year in 2000 with improved prices for most items, 2001 values were down nearly 15%. With few exceptions, most commodities declined in value with some seasonal items, such as peppers and celery suffering major declines after September 11. Poorer growing conditions in the spring contributed to less harvested acres for the year and generally lower yields.

Crop	Year	Harvested Acreage	Production Per Acre	Total	Unit	Per Unit	Total

Nursery Products

Unlike major increases in previous years, nursery product values increased by only about 2% from 2000. The value for most nursery items declined compared to 2000 due to the slowdown in the economy and the aftermath of September 11.

Vegetable	2001	59	55	97,500
	2000	1008	1008	3,870,000
TOTAL	2001	689	585	\$387,500
Seed Crop	2000	2,174	2,142	4,383,000

* Barley, Oats, Wheat

Field Crops

Growing conditions for field crops were generally favorable. Hay crop values rebounded while grain crops continued the recent trend of declining value.

Crop	Year	A Planted	creage Harvested	Prod Per Acre	luction Total	Unit	Value Per Unit	Total
Alfalfa Hay	2001 2000	3,150 3,240	3,150 3,240	7.62 7.36	24,003 23,846	Ton Ton	\$128.00 \$110.00	\$3,072,000 \$2,623,000
